

PRODUCT PAPER

Workforce Authorization Management™ (WAM™)

Dassian WAM - Workforce Authorization Management - module is an invaluable tool for managing project teams and effectively authorizing labor charges.

Unlike the standard Project System (PS) resource tools, which are either too complex or too simple, the WAM module provides for fully integrated project team assignment, visibility, and labor charge authorization and control. WAM seamlessly integrates the PS and Cross Application Time Sheets (CATS) modules in your SAP system to provide project and resource managers a quick and easy role based workbench to assign project personnel to tasks for specific periods of time.

AT A GLANCE

Product Name

Workforce Authorization Management (WAM)

Product Code

DP014 release 1.0

SAP ERP Release Compatibility

SAP R3 4.7 to present

Requirements

SAP Project Systems (PS)

SAP Cross Application Timesheet (CATS)

Company

Dassian Incorporated

Location

6900 E. Camelback Road

Suite 805

Scottsdale AZ 85251-8054

Assignment dates can be static or they can be changed automatically as your PS dates change. Personnel assignments are as easy as drag and drop!

WAM KEY BENEFITS

- ✚ Provides project and resource managers an easy way to assign the correct employee for the appropriate start and end dates
- ✚ Eliminates labor mischarging from non-authorized personnel
- ✚ Eliminates the high cost of manually correcting labor mischarges
- ✚ Provides an easy way to stop labor charging without the need to change your project master data or status - No longer do you have to wait until month end close!
- ✚ Allows flexible creation of Project Team groupings without the need for changes to your HR Organization or Work Centers
- ✚ Simplifies time entry in CATS by displaying the authorized work assignments in the worklist
- ✚ Prevent costly holiday or weekend labor charging without express prior approval
- ✚ Time entry is automatically validated in real time! No longer do you need to wait until it is too late to prevent labor mischarging

WAM KEY FEATURES

- ✚ Role based workbench assignment of personnel to Account Assignable charge objects in SAP; including WBS and Network Activities/Elements
- ✚ Drag and drop personnel assignment of single individuals or entire groups
- ✚ Project dates are automatically proposed during assignment
- ✚ Workbench assignment of single activity type or groups of activity types to a project - real time validation of the activity type at time entry
- ✚ Resource evaluation workbench provides overall analysis of employee or group utilization
- ✚ Notes capability for the annotation of additional information and details of the personnel assignment
- ✚ Follows Dassian's golden rule of NO system modifications

Assignment

Assignment	Name
